# MF 300 Series Seed Drill

# The robust, reliable MF 300 Series

## Trailed Grain & Rice Seed Drill, 20-26 rows

Specifically designed to meet the needs of professional small grain and fine seed growers e.g. grass. The MF 300 Series seed drills are solidly built, reliable drills with a choice of 20, 22, or 26-row configuration. The fixed 17cm row spacing has been calculated as being optimum for small seed crops. The MF 300 Series seed drills can plant on conventional, minimum-till, and no-till soil conditions.

Seed is metered from the large capacity combined hopper using a fluted roller. The 41cm (16") double-disc openers ensure precise seed placement with depth limiting rims for depth control followed by angled cast press wheels to ensure efficient closure of the seed zone. The MF 326 model is equipped with hydraulic row markers.

The seed drills are fitted with a versatile Ferti-System™ as standard. They also come with a fine seed kit as standard for very small seeds e.g. grass.

Another standard feature is the mechanical end tow hitch for easy and safe transport with a width of 2.5 meters. Infield, however, the large 14.9"x 28" tyres ensure minimum soil compaction and excellent traction.

A moveable partition allows easy adjustment of the seed/fertilizer ratios – particularly useful when planting soybeans.

## Specifications

Model	Rows	Minimum Power Required hp (kW)	Working Width(m)	Maximum Capacity (Kg)	
				Seed	Fertiliser
MF 320	20	90 (67)	3.23	662	975
MF 322	22	100 (75)	3.57	728	1072
MF 326	26	120 (89)	4.25	859	1265
